Maifee UI Asad

Student at University of Chittagong

Summary

I am Maifee . Currently I study in CSE,CU . I am also a indie game developer . I'm new in this field , experience of just two year . I mainly use Unity Engine , Blender Engine and Unreal Engine for my development . Love to code . In my free times I try to get familiar with other engines and languages and new algorithms . I'm also trying to make my own gaming library in Java (I know Java is obsolete and this sounds more than weird , but Java was included in my course , yes I'm from Bangladesh) . So coding in C++,Java,Java-scripts are ok with me. I have already made a game with my team and published on Play Store."Mazy ball" - from "Team Zeroth" . I have also my own text editor and now it can compile C and Java codes. Currently I am trying to create my own language, called - 'Guishap'.

Love to work with new people , crazy , dedicated , happy , committed to work .

Adiós Amigos,Señors (Dependent)

Adiós.
